Microbiology

Bray M. Dege

The study of microscopic organism

1. Discuss the character of diff micro
2. Bacterial Dactin & virus
3. Identify {Chickadee signifying} microorg.

0.01 millimeter
mm -

Are microscopic organism -

light
microscope.

0.01
10 mm

mm -

electron
microscope.

Why study micro? {HIV} TB - small pox #

measles, malaria, cholera, {HIV} H1N1, {Dengue} #.

Covid # MERS CoV # Respiratory # Dengue #

{Chikungunya} # Parvovirus # Tetanus (Tetanus)

150

Known infections Diseases #

Candida Albicans - yeast - [normal flora]

Normal flora - growth goes up in excreta - bacteria.

Immune system drops - disease sets in =

Normal flora are bacteria species - in other places

They cause an infection.

Bacteriology + Bacteria.

Virology + virus

Mycology + fungi

Parasitology + Parasites
